## NOT VOTING—6

Camp	Gutierrez	Rush
Cox	Jefferson	Scarborough

□ 1418

Messrs. BLUMENAUER, WATT of North Carolina, and PASTOR, and Ms. WOOLSEY and Ms. MCKINNEY changed their vote from "yea" to "nay."

Mr. JONES of North Carolina and Mr. COBURN changed their vote from "nay" to "yea."

Mr. BEREUTER changed his vote from "present" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## STUDENT RESULTS ACT OF 1999

Ms. PRYCE of Ohio. Madam Speaker, by the direction of the Committee on Rules, I call up House Resolution 336 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

## H. RES. 336

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 2) to send more dollars to the classroom and for certain

other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed 90 minutes equally divided and controlled by the chairman and ranking minority member of the Committee on Education and the Workforce. After general debate the bill shall be considered for amendment under the five-minute rule for a period not to exceed six hours. It shall be in order to consider as an original bill for the purpose of amendment under the five-minute rule the amendment in the nature of a substitute recommended by the Committee on Education and the Workforce now printed in the bill. The committee amendment in the nature of a substitute shall be considered as read. All points of order against the committee amendment in the nature of a substitute are waived. No amendment to the committee amendment in the nature of a substitute shall be in order except those printed in the portion of the Congressional Record designated for that purpose in clause 8 of rule XVIII and except pro forma amendments for the purpose of debate. Each amendment so printed may be offered only by the Member who caused it to be printed or his designee and shall be considered as read. The amendment numbered 5 shall not be subject to amendment and shall not be subject to a demand for division of the question in the House or in the Committee of the Whole. The Chairman of the Committee of the Whole may: (1) postpone until a time during further consideration in the Committee of the Whole a request for a recorded vote on any amendment; and (2) reduce to five minutes the minimum time for electronic voting on any postponed question that follows another electronic vote without intervening business, provided that the minimum time for electronic voting on the first in any series of questions shall be 15 minutes. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted. Any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommend with or without instructions.

The SPEAKER pro tempore (Mrs. EMERSON). The gentlewoman from Ohio (Ms. PRYCE) is recognized for 1 hour.

Ms. PRYCE of Ohio. Madam Speaker, for the purpose of debate only, I yield 30 minutes to the gentlewoman from New York (Ms. SLAUGHTER), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Madam Speaker, House Resolution 336 is a modified, open rule that provides for consideration of H.R. 2, the Student Results Act. The legislation authorizes Title I of the Elementary and Secondary Education Act, as well as a number of other programs, which assist some of our Nation's neediest students.

Over the years, educational programs for the disadvantaged have failed to accomplish their core mission: closing

the achievement gap between wealthy and poor students. And while the Title I program has its faults, its shortcomings have not led us to abandon it. We believe that through thoughtful, common sense reforms in Title I, we can make some real progress for children and achieve the results we have been striving for for more than 30 years.

The Students Results Act improves upon the existing Title I program not only by increasing our investment in education, but also providing for greater accountability, more parental involvement, well-trained teachers and local flexibility to implement school reforms that work. I, for one, am looking forward to today's debate, because it is not about who can spend more money; we are increasing Title I funding in this bill. Instead, it is about new ideas and having the courage to admit some failures and move in a new direction.

Under the rule, the House will have 90 minutes to engage in general debate, which will be equally divided and controlled by the chairman and ranking member of the Committee on Education and the Workforce. Let me take this opportunity to congratulate the gentleman from Pennsylvania (Mr. GOODLING), the chairman of the Committee on Education and the Workforce, for his hard work and determination through a lengthy markup process to put this bipartisan legislation together. His committee reported it by a vote of 42-to-6.

It is always great to have bipartisan agreement on an issue as crucial to our Nation's future as education. The bill has earned even the administration's support. Still, some of our colleagues would like a chance to amend it. Therefore, the Committee on Rules has provided for an open amendment process.

Under this rule, any Member who wishes to improve upon H.R. 2 may offer any germane amendment, as long as it is preprinted in the CONGRESSIONAL RECORD.

In the case of the manager's amendment numbered 5 in the RECORD, the rule provides that it will not be subject to amendment or to a demand for a division of the question.

To ensure that debate on H.R. 2 is adequate, yet focused, the rule provides for a reasonable time cap of 6 hours during which amendments may be considered. Overall, the House will have almost 9 hours to debate the provisions of and changes to the Students Results Act, which should be more than ample time, given the bill's widespread support.

To further facilitate consideration of H.R. 2, the rule allows the Chair to postpone votes and reduce voting time to 5 minutes on a postponed question, as long as it is followed by a 15-minute vote. After the bill is considered for

amendment, the rule provides for another chance to make changes to the bill through the customary motion to recommit, with or without instructions.

Madam Speaker, Title I is the anchor of the Elementary and Secondary Education Act and it is the largest Federal and elementary education program.

□ 1430

Since its creation in 1965, taxpayers have provided over \$120 billion in funding to teach disadvantaged children.

The initial investment in title I back in 1965 was \$960 million, which grew to \$7.7 billion by 1999. H.R. 2 continues our commitment to disadvantaged kids by authorizing more than \$8 billion for title I next year, but we are not just throwing more money at education and claiming victory. We know that more dollars will not automatically translate into smarter kids. H.R. 2 strengthens academic performance by holding all States, school districts and individual schools accountable for ensuring that their students meet high academic standards.

One incentive to produce results will come through the promise of cash rewards to title I schools that close the achievement gap between students.

The success or failure of title I schools will be documented in annual report cards that will be distributed to parents and communities; and when schools fail to show improvement parents will be given the opportunity to take their children out of failing schools and enroll them in other public or charter schools. It is simply unfair to trap children in schools where they cannot learn so we give them a bit of freedom, including money for transportation to a new school through this legislation.

The Student Results Act also recognizes that good results cannot be gotten without well-trained teachers. Good teachers are our best chance to help our children succeed. H.R. 2 ensures that all newly hired teachers funded by title I dollars are fully qualified by raising the standard for teachers' aides.

Under the bill, teaching assistants will need to have 2 or more years of college education or an associates degree. Local communities will have greater flexibility to ensure their Federal dollars are meeting the real needs of their student population. For example, local education agencies will be able to combine and commingle Federal funds to address the needs of small rural school districts or the needs of Indian children.

These are just a few of the reforms the Student Results Act will make to move our Federal education policy toward the principle of accountability, quality teaching, and local control.

There are also a number of other programs authorized in this legislation,

including migrant education; neglected and delinquent youth; magnet school assistance; Native American, Hawaiian and Alaskan programs; gifted and talented students; rural education; and the Stewart B. McKinney Homeless Assistance program.

The reforms made in these programs through H.R. 2 will move us away from the Washington-knows-best model of the past to a policy that equips parents, communities, and schools with the resources, authority, and accountability to ensure that every uniquely talented child has the opportunity to succeed.

Madam Speaker, I encourage my colleagues to join in today's debate about the future of our children and our Nation by supporting this fair rule that will provide for a full debate on a key component of our Federal education policy. I urge a yes vote on both the rule and the Student Results Act.

Madam Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Madam Speaker, I yield myself such time as I may consume, and I thank my good friend, the gentlewoman from Ohio (Ms. PRYCE), for yielding me the time.

Madam Speaker, House Resolution 336 provides for the consideration of the underlying bill H.R. 2, the Student Results Act. This is a modified open rule which limits debate on amendments to the bill to 6 hours. This means the clock may run out on amendments which Members have prepared and which deserve to be heard.

Madam Speaker, it is not as though the House has considered such a plethora of landmark legislation that we do not have a little extra time to discuss and debate how best we give our children a quality education, but the rule inhibits that debate. Last night in the Committee on Rules a motion was offered for an open rule with no limitation on time, but it was rejected.

The rule also depends on a preprinting requirement which further works to limit the exchange of ideas. These are defects in this rule which should not go unnoticed. At the same time, I should point out the rule expressly includes the opportunity for a very important amendment offered by the gentlewoman from Hawaii (Mrs. MINK) and numerous other colleagues who share my very deep concern with the issue of gender equity.

Since 1974, the Women's Educational Equity Act has provided teachers, administrators, and parents with the resources, materials, and tools to combat inequitable educational practices. The act trains teachers to treat girls and boys fairly in the classroom, and allows the training of teachers to encourage girls to pursue the careers and higher-education degrees in science, engineering, and technology, careers they very well may want but are actually discouraged from pursuing.

The act also funds the Center for Women's Educational Programming, which conducts vital research on effective approaches to closing the gender gap in education, as well as developing curriculum and model programs to ensure that these effective approaches are implemented.

From its inception, this act has funded over 700 programs while requests for information and assistance continue to grow. From February to August of this year, the Resource Center received over 750 requests for technical assistance, and that is a lot of requests for a country that presumes it has reached gender equity, as my colleagues on the other side of the aisle would have us believe.

The question today is not, What needs does it meet? It is obvious that it meets the important gender equity needs of our public education system. And the question before us today is why should we reauthorize the Women's Educational Equity Act? The majority would have us believe that we should not reauthorize it. They argue that gender equity has been accomplished and gender inequity or discrimination in the classroom is a thing of the past or does not exist, but this is not the case.

According to a recent report conducted by the American Association of University Women, women are close to 50 percent of America's population. Yet they earn only 7 percent of the engineering degrees and 36 percent of the math degrees. Women are only 3 percent of CEOs at Fortune 500 companies, but in the face of such statistics the majority considers gender equity programs no longer useful. They would rather ignore these statistics and allow girls' educational needs to be neglected. They would rather we eliminate a current long-standing program that ensures fairness and equal opportunities in our classrooms that would ultimately undermine our commitment to title IX, which has been so helpful to young women in this society.

Madam Speaker, I urge my colleagues to vote in support of the Mink/Woolsey/Sanchez/Morella amendment to the Student Results Act. This amendment will reauthorize the Women's Equity Act and reaffirm our commitment to gender equity. The importance is as important today as it was in 1974. To this very day, guidance counselors are advising young women away from the careers that they would like to have, careers in science and math, and urging them to go into five fields which have generally over the years been delegated only to women.

We cannot afford to waste that brain power in the United States, Madam Speaker; and those of us who are the mothers and grandmothers of young women insist that they be given equal opportunity to achieve everything that they want to achieve. So I want to urge

my colleagues, please do not slam the door to gender equity on America's girls, just as they are starting to walk through it. The gender equity provision being left out is a glaring omission in a bill which otherwise has many meritorious provisions.

Madam Speaker, I reserve the balance of my time.

Ms. PRYCE of Ohio. Madam Speaker, I am very pleased to yield such time as he may consume to the gentleman from California (Mr. DREIER), the very distinguished chairman of the Committee on Rules.

Mr. DREIER. Madam Speaker, I thank my friend, the gentlewoman from Ohio (Ms. PRYCE), for yielding me this time.

Madam Speaker, I rise in strong support of this very fair and balanced modified open rule. Improving public education, when we put together the list of priorities that we wanted to address in the 106th Congress, was number one. We went through the issues of providing tax relief to working families, rebuilding our defense capabilities, saving Social Security and Medicare; but when we began that list, we had improving public education up there because we know that if our Nation is going to remain competitive globally we have to do what we can to bring about that kind of improvement.

We moved forward earlier in this Congress by passing the Education Flexibility Act, and I am very pleased that the President agreed to sign that measure. It took a little while to get him there, but I am very pleased that he did. This legislation is similar in that it enjoys bipartisan support, and I hope it will gain the President's signature also.

The public education improvement bill is based on four very simple basic and easily understandable principles: quality, accountability, public school choice, which is very important, and flexibility.

The bill will improve educational opportunities available for children that already face the many challenges that accompany poverty in this country. It is simply not acceptable that the public education system is failing our Nation's disadvantaged children. It is clearly time to shift our focus to a results-based education system. For the sake of the children, we cannot accept anything less than the best. We need clear improvements in academic achievement at the local and the State level.

As we focus on actual results, we need to reward progress. This legislation will allow States to reward the schools that are successful at closing the achievement gap between children of different income levels. We are moving in the right direction on education; and, again, it is good that we are enjoying bipartisan support in that quest.

We are investing in quality public schools, and we are demanding real re-

sults. We are showing that Congress is committed to success, but we are giving State and local leaders the flexibility to develop the solutions. Most important, we are relying on parents, teachers, and principals to make good choices because we trust them to do what is best for our Nation's young people. This is a very, very good piece of legislation. I know that we are going to be dealing with several amendments on it; but when we finally get through with it, I hope we will have a very strong, overwhelming vote and that we will be able to again get a presidential signature on it.

Ms. SLAUGHTER. Madam Speaker, I yield 3 minutes to the gentleman from Texas (Mr. RODRIGUEZ).

Mr. RODRIGUEZ. Madam Speaker, I rise today in opposition to H.R. 2, the so-called Student Results Act. What this really is is an attempt to block access to educational services for certain groups of this country. As we all know, title I serves as the cornerstone of Federal support for students most at risk of low educational achievement. Included in this profile for serving at risk students are limited English proficiency youngsters.

During the last reauthorization of the Elementary and Secondary Education Act, it was decided that the limited English proficiency students were entitled to educational services under the same basis that other children receive under title I; and I repeat, they are entitled to the same basis of education under title I.

All of a sudden now we have a different provision in H.R. 2 that will essentially deny access for millions of limited English proficiency youngsters in title I educational services. The schools in my district and throughout the State of Texas and this country are committed to providing limited English proficiency youngsters with the necessary language support services to ensure that limited English proficiency students achieve high academic standards.

The language in the legislation as it stands now would prohibit schools in my district and throughout the country from providing this necessary language support services for students until the parent provides consent. Why are we picking only on this particular group? Why do we not have, for example, the disabled ask for consent? Why do we not have Anglo children have to get their parents to get an okay? We do not have that. We have decided to pick on limited English proficiency youngsters. As we move forward, in terms of students, we have to look at them as a whole. It is simply ridiculous to think that by singling out the limited English proficiency youngsters to say that it is fair, it is not.

It is discriminatory. It is discriminatory unless it is applied to every single child. If we look at the language the

way it is written, it is very obvious that anyone could see that those youngsters are being picked on.

If we want to talk about parental involvement, then I am ready to support parental involvement. I am ready to require that parents need to show up in the classroom. I am ready to make sure that we have those programs to get them involved.

□ 1445

But for them to be the only ones within this particular piece of legislation, for them to be required to have to come up and sign for parental consent, it is unfair, and it is discriminatory.

I would like to urge my colleagues to think long and hard about supporting legislation that picks on children. Plus this legislation raises serious questions about the whole issue in terms of how we are denying access of these educational opportunities to these individuals.

As far as I am concerned, the parental consent provision on Title I violates the Civil Rights Act of 1964, and there is no way that we should stand for that. I ask my colleagues to seriously consider voting no.

Ms. SLAUGHTER. Madam Speaker, I yield 3 minutes to the gentlewoman from Florida (Mrs. MEEK).

Mrs. MEEK of Florida. Madam Speaker, I never thought the time would come again when I would have to come to the floor and speak out against any changes in gender equity for our women and for our girls. Each of my colleagues has women and girls in their family, and we must continue to be sure that they receive the equity that they deserve.

So I rise in support of efforts being made today, particularly the Woolsey-Sanchez-Morella amendment, an amendment which is coming up pretty soon, to reauthorize the Women's Educational Equity Act.

Because of our far-reaching legislative efforts to ensure gender equity, America is much more equal today and more educated, and it is a more prosperous Nation. But to be sure, we cannot relax any of our efforts as long as we are leaning toward equity. To be sure, much has been accomplished, but there is still a gender gap in America's schools, and we cannot afford that to happen.

The changing Nation that we live in today, and it is constantly changing as we enter the new millennium, demands a more gender-fair education, not a less one. It is even more important now than it was years ago to be sure to prepare our women to enter the new century.

Prior to the enactment of the Women's Educational Equity Act in 1974, only 18 percent of women had completed 4 or more years of college compared to 26 percent of all men. Though America is far more equal since the enactment of the Women's Educational

Equity Act, it is not equal. Because it is not equal, we must continue our efforts.

Despite many gains women have made toward equal education attainment and our accompanying gains in the labor force, our earnings are only 80 percent of the earnings of our male counterparts. What do my colleagues think led to that? What led to that was that the educational efforts have been improved, but our salaries have not.

If America is to be her true creed and to her level best, we must continue the work we have begun to eradicate discrimination based on gender. Discrimination anywhere, Madam Speaker, whether it is based on gender, whether it is based on race, whatever it is based upon is unequal, and it is not good for our wonderful country of America.

Yes, there have been peaks and valleys in this process, but we cannot ignore the fact that inequality and discrimination still remain in the fabric of our lives even as we close out this century.

Madam Speaker, we want to be sure to support every facet of the Women's Educational Equity Act as well as the Woolsey amendment.

Ms. SLAUGHTER. Madam Speaker, I yield 3 minutes to the gentleman from Tennessee (Mr. CLEMENT).

Mr. CLEMENT. Madam Speaker, I thank the gentlewoman from New York (Ms. SLAUGHTER) who does such a wonderful job representing our interests, like the gentleman from Missouri (Mr. CLAY).

I know on this particular issue I want to brag on the Republicans, too. It appears like we do have something that we can agree on. This year has not been the most productive year I have been in Congress. But I will say to my colleagues that, if we can rally around the flag and do something for education, that is important for all of us. Because I stand before my colleagues as a former college president for 4½ years prior to being elected to the United States Congress. I am also co-chair of the House Education Caucus with the gentleman from Missouri (Mr. BLUNT).

I stand in strong support of the rule and in strong support of H.R. 2 and our Nation's public schools.

I place a high priority on Title I programs and improving our schools. Quite simply, H.R. 2 is a good, sound bill that emphasizes and builds on what we know works. It expands public school choice, improves the quality of instruction in Title I classrooms, and drastically improves the accountability measures in these programs.

It continues the targeting of Title I resources to the schools with the highest poverty level and adds a new focus to include State, school district, and school report cards to help parents and States monitor student achievement. Strengthening the quality of instruc-

tion provided in the classroom is essential in achieving results for all students. In addition, all students and their teachers should be held to high standards. We cannot afford to let any of our schools or students fall through the cracks.

Madam Speaker, I have four very intelligent students visiting Washington, D.C. just this week to participate in the Voices Against Violence conference. They are shining examples of the best of what our schools can produce.

I urge my colleagues to support H.R. 2, to continue to provide these students and their peers with the programs and opportunities they need to be the leaders in their schools and communities.

I am pleased that the gentleman from Indiana (Mr. ROEMER) has been very active as well, and has offered a lot of new initiatives and new programs in order to move this country forward.

Education is the best, cheapest, and fastest way to keep and retain a strong middle class in America. Support H.R. 2.

Ms. SLAUGHTER. Madam Speaker, I yield 5 minutes to the gentleman from New York (Mr. OWENS), an expert in education.

Mr. OWENS. Madam Speaker, I rise in protest of a rule which limits the debate on the most important education bill that we will have in the next 3 or 4 years. This is a reauthorization of Title I, which is the core of the Elementary and Secondary Education Assistance Act. They have chosen to break up the Elementary and Secondary Education Assistance Act in small parts. But this is the part that is most important.

Why do we have to have a limited debate if we are not busy doing many other constructive things here? Why cannot we have an open debate and let every Member have a chance to speak who wants to speak? I think that this is an issue that probably every Member of Congress should go on record on.

The American people have made it quite clear that they think education is of utmost importance. Recent polls have just continued to reaffirm what the old polls have been showing us for years. The ABC News and Washington Post poll, which was released on September 5, 1999, said that improving education was the top issue when people were asked to list 15 issues of great importance. Improving education was listed by 79 percent as number one; handling the economy was 74 percent; managing the budget, 74 percent; handling crime, 71 percent; Social Security was 68 percent, in fifth place compared to education.

Education, in the minds of the public, both the Republicans and Democrats and Independents, clearly they see with their common-sense vision that this is the most important issue

right now that we should be addressing.

They do not make an issue out of whether the Federal Government should do it or the State government or the city government. In their common-sense wisdom, they understand that all levels of government are involved already. They probably understand that local governments and State governments have the greatest responsibilities and contribute the greatest amount of money, but they want the Federal Government to be involved still.

They said also that, among the education priorities—this is the National Public Radio, Kaiser Family Foundation, Kennedy School of Government survey, which was conducted September 7, 1999—they said that among the education priorities within that category, fixing rundown schools is number one. Ninety-two percent said that we should fix rundown schools first; reducing class sizes was number two, 86 percent; placing more computers in the classroom, 81 percent.

My colleagues know that the people have spoken. Why do we only have 6 hours for the amendments and 2 hours for the general debate? Why do we not come and respond to the people? They are saying this is most important. They did not talk about any F-22s, and they did not say we should go search for billions of dollars to keep the F-22s in testing or engineering. They said education is number one. If education is number one, then why not spend all the time we need to discuss it?

There are some basic items which we now must come to grips with. People are still running around saying that the Federal Government is not responsible for education; therefore, the Federal Government should play a limited role; the Federal Government should not get into school construction; the Federal Government should not do this.

We play a limited role, and we want to increase the Federal involvement threefold, fourfold. We still would be playing a limited role. The Federal Government expenditures for education now is about 7 percent. Most of that goes to higher education. If we increased it by up to 25 percent, it is still a 25 percent Federal role, 75 percent State and local government. State and local government clearly are responsible primarily, but why not have more of the Federal role?

All taxes are local. They begin at the local level. The taxes that come to Washington come from local areas. We manufacture money in the mint here, but that money represents the wealth that has come up from the States.

So my plea on the rule is that it should be an open rule that really gives all the time necessary. Every Member was allowed to speak, I remember, when we had the debate on the Gulf

War. It was a matter of war and peace, and they felt we should all be able to express ourselves.

This is a matter of the peace for the future. The key to the peace for the future is education, starting with education in America. We are ahead of everybody else. We should stay ahead of everybody else. But we need a great pool of well-educated people. That pool is going to have to come from the poorest people.

The middle-class sons and daughters are already committed. They are going to be the doctors and lawyers and Wall Street bankers. They are not going to be information technology workers. They are not going to be the people who do the sheet metal work. I went to the sheet metal work training center, and they have more computers in the sheet metal training center than they have in the schools. They now use computers to do the sheet metal work.

Everything is driven by computers, and they need people who have a basic education. The Army and the Navy, they need recruits who have some aptitude for handling high-tech weapons. Everything needs education, and we should spend the time talking about how we, as a Congress, are going to respond to the public's call for more help with education.

Ms. PRYCE of Ohio. Madam Speaker, I am pleased to yield 3 minutes to the distinguished gentleman from California (Mr. BILBRAY).

Mr. BILBRAY. Madam Speaker, I stand here today in support of this rule. I think it is a very fair rule. For those of us that want to introduce amendments, we have 7 to 8 hours to be able to improve this base bill.

One of the things I would like us to take a look at that we have sort of forgotten over the last years is that, in 1996, we had an immigration reform bill, and there was a very heated discussion on this floor about the issue of should the Federal Government, should Congress mandate that local school districts had to educate illegal aliens, not the children of illegal aliens, but illegals.

I think we came to a consensus one way or the other, some did not agree, that this was important enough to the national well-being to require that all school districts have to provide education to those who are in this country, legal or illegal.

Now, I am going to introduce an amendment that will revisit that issue because I think it is only appropriate that, in a city that we say that we want the poor, we want the needy, we want the disadvantaged to have equal access, we also need to say that those working-class communities should have equal access to their tax money, and that the Federal Government should not be requiring the education of illegals at the disadvantage of the legal residents in those school districts.

□ 1500

So all my amendment is going to say is, just as we recognize the Federal impact on local schools when the military goes into an area and requires education of military children, we also are going to now finally recognize the Federal impact on local school districts when we basically have illegal immigrants in the school districts and are requiring them to be educated.

So what I am talking about right now, Madam Speaker, is the fact that it is time that Washington starts paying for the unfunded mandate that we clarified in 1996. And let me point out that that unfunded mandate does not impact the rich, powerful districts. It impacts disproportionately the poor working-class districts of color. This is an issue of fairness, that those who have the least are being required to pay the most for this problem, and it is time for us to address that.

So I ask my colleagues on both sides of the aisle not to walk away from this issue. We made lofty statements and made a decision that we were going to mandate this service. Now it is time that we revisit it and say let us back up our kind words with dollars and cents and let us send the reimbursement to those working-class neighborhoods across America that are being asked to bear the burden of our mandate. I think we not only have a right to start paying for this expense, Madam Speaker, we have a responsibility to start paying our fair share.

Ms. SLAUGHTER. Madam Speaker, I have no further requests for time, and I yield back the balance of my time.

Ms. PRYCE of Ohio. Madam Speaker, I yield myself the balance of my time and, in closing, I would remind my colleagues this rule provides for consideration of a bipartisan bill through an open amendment process. Any Member may offer any germane amendment as long as it is preprinted in the CONGRESSIONAL RECORD. The rule does impose a 6-hour time limit on the consideration of amendments; but, overall, the House will have almost 9 hours to debate the Student Results Act and propose changes to it. On top of the 4-day markup held by the Committee on Education and the Workforce, 9 hours of debate on the House floor is wholly adequate.

Madam Speaker, with the passage of this rule, the House will embark on a very important debate over Federal education policy. Today, we are not squabbling about money, we are talking about kids and the tremendous investment that we are making in them. Let us make sure that that investment pays off and our success is measured by the academic performance of students in schools. Where there is failure, let us expose it and be bold enough to try something new. Where there is success, let us reward it and strive to repeat it. And in all of this, let us remember that

the best interests of the children must always be paramount.

Madam Speaker, I hope my colleagues will join me in supporting this fair rule so that we can move on to debate legislation that represents the single largest component of our effort to improve elementary and secondary education. I urge a "yes" vote on the rule and the Student Results Act.

Madam Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. BARRETT of Nebraska). Pursuant to House Resolution 336 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2.

□ 1504

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2) to send more dollars to the classroom and for certain other purposes, with Mrs. EMERSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Pennsylvania (Mr. GOODLING) and the gentleman from Missouri (Mr. CLAY) each will control 45 minutes.

The Chair recognizes the gentleman from Pennsylvania (Mr. GOODLING).

Mr. GOODLING. Madam Chairman, I yield myself such time as I may consume.

Madam Chairman, today the House will consider H.R. 2, the Student Results Act, and the major focus of this bill is to reauthorize but, above all, improve title I, which is the single largest Federal grant program for helping educate disadvantaged students.

The bill includes a number of other programs targeted at disadvantaged students, including Indian education, gifted and talented, magnet schools, rural education and homeless education; and I am especially pleased that H.R. 2 also includes key changes to the migrant education program for which I have fought long and hard over the years.

This bill has broad bipartisan support. It was reported from our committee by a vote of 42 to 6, and I would like to thank the full committee ranking member, the gentleman from Missouri (Mr. CLAY); the subcommittee member, the gentleman from Michigan (Mr. KILDEE); and the gentleman from California (Mr. GEORGE MILLER), above all; and many others for their key contributions to putting this legislation together.

The Student Results Act was put together with four overarching principles in mind: quality, accountability, choice, and flexibility. And let me review briefly how each of these has been embedded throughout H.R. 2.

The notion of focusing Federal education programs and quality has been my mission since joining Congress some 25 years ago. Coming here as a superintendent and as a school board president, I knew Head Start was not working, and I knew how to fix it. I knew chapter 1 was not working, which became title I, and I knew how to fix it. But I could not do anything about it. It was so obvious. And I am so happy that, finally, when we reauthorized Head Start, not the last time but the time before, it was the first time we talked about quality. And the last time we reauthorized it, we really talked about quality; and I thank Secretary Shalala because she shut down 100 dysfunctional Head Start programs. I could not get my people to do that when they were down there. So, finally, we are talking about quality.

We have to do the same thing with title I, because it is obvious, all the studies have indicated, that we are not helping disadvantaged youngsters close the academic gap between disadvantaged and nondisadvantaged. So we have to do something to make sure that we do that.

So let me start with the issue of quality, the most important issue facing us today. One of the most distressing features of the title I program for too long and in too many places was that it became a jobs program rather than a program to try to change the disadvantaged to become advantaged academically. So we have dealt with that issue.

And we now have, for instance, over 75,000 teacher aides. Big news. All they had to do was have a GED 2 years after they got the job. Somehow or other, unfortunately, they were teaching reading and they were teaching mathematics, many times without the supervision of a qualified teacher. And these youngsters need the most qualified teachers we can possibly find in order to help them.

So we are freezing the number of teacher aides that they can hire, and we are telling them there are a lot of things they have to do in order to make sure that they continue as teacher aides. Now, my side, some of my Members, do not like that. They say we are telling local districts what to do. Well, it is Federal tax dollars, 100 percent. The program has failed, and we simply cannot fail these youngsters any longer. We cannot have 50 percent of our children in this country in a failing mode.

The Student Results Act includes a lot of other quality issues. One is that they can use some of their new money to reward those who are doing well.

The most devastating letter that I got was from one of the largest lobbying groups that deals with these disadvantaged youngsters. And in there they indicate to not reward anybody for doing well, just give them the money and they will continue doing poorly, not giving these children an opportunity for anything that every other child has an opportunity to receive. That is pretty disheartening to get that kind of thing from one of the largest lobbying groups for these particular youngsters and their parents.

Let me make a couple of very important points about accountability. The bill does not provide for more accountability to the Federal Government. Instead, what we are insisting on is more accountability to parents. We thank the gentleman from California (Mr. GEORGE MILLER) for a lot of the information and a lot of the parts that have been put in here in relationship to the accountability provision.

The Student Results Act says that children attending schools classified as low performing must be given the opportunity to attend a higher quality public school in their area. In other words, if that school is a poor performing school, and designated as such, those parents and those children should be able to escape and go to another school within that school district that is not a poor performing school. And we say that in order to get there, there will have to be some transportation money, and they can use some of this money in order to transport their youngsters to that particular point.

We also do things for those school districts that are small, rural school districts particularly. School districts with less than 1,500 students, which is more than 10 percent of the school districts in America, will be exempted from several formula requirements, giving them the flexibility to target funds in a manner which best suits their needs.

In conclusion, I would ask that we consider this bill in the context of our larger efforts at the Federal level to improve education in this country. We started with EdFlex, which passed the House with an overwhelming majority. We followed up with the Teacher Empowerment Act. Now we are considering title I. Again, I would like to emphasize that 50 percent of the youngsters in this country are not getting a quality education. And if we are going to remain a number one country, we positively cannot continue that. They must be in a position to do well in our 21st century.

So I would hope that we get bipartisan support in passing this legislation.

Madam Chairman, I reserve the balance of my time.

Mr. CLAY. Madam Chairman, I yield myself 5 minutes.

Madam Chairman, next April will mark the 35th anniversary of the Elementary and Secondary Education Act, a flagship great society program that underscored our country's national commitment to help communities improve their public schools.

We have come a long way since the deplorable, segregated, and neglected public schools of yesteryear, but not far enough. Today, too many States and too many communities lack either the political will or the financial resources to ensure that poor children get a good education. Too many poor communities lack fully qualified teachers, safe schools, and access to emerging school technology.

Recent reports show that title I is making strides in increasing student achievement. Ten of 12 urban school districts and five of six States reviewed showed increases in the percentage of students in the highest poverty schools who met district or State standards for proficiency in reading and math. These results should serve to broaden our commitment to increase investment in public schools while strengthening accountability for results.

I support this legislation because it strengthens our commitment to improve educational opportunities for students, regardless of their race, economic status. Or special needs. It targets funds to our most disadvantaged children and schools, it requires States to have rigorous standards and assessments, and it increases the title I authorization to \$8.35 billion.

The bill imposes strong sanctions for schools who continue to fail after receiving substantial assistance. It also ensures that teachers and teacher aides are fully qualified. I am very pleased that we will include title VII, bilingual education, as part of the manager's amendment, and I commend the gentleman from California (Mr. MARTINEZ), the gentleman from Texas (Mr. HINOJOSA), and the gentleman from Puerto Rico (Mr. ROMERO-BARCELÓ) on our committee who helped forge a compromise on this critical program.

Madam Chairman, H.R. 2 clearly prohibits the use of title I funds for private school vouchers. The proposal to allow vouchers was overwhelmingly rejected by our committee members.

The bill is not a perfect bill, however. There are some provisions that undermine programs for women's equity in education, that repeal the Women's Educational Equity Act, that eliminate the provision that trains teachers to eliminate gender bias in the classroom, and terminates dropout prevention programs for pregnant and parenting teens. The gentlewoman from Hawaii (Mrs. MINK) and the gentlewoman from California (Ms. WOOLSEY) have prepared amendments to restore these provisions, and I hope that this body will vote in favor of them.

Madam Chairman, I want to thank the subcommittee ranking member,

the gentleman from Michigan (Mr. KILDEE), for his work on this bill and the committee members on our side, each of whom made important contributions to the bill. I also want to thank the chairman of the committee, the gentleman from Pennsylvania (Mr. GOODLING), and the subcommittee chairman, the gentleman from Delaware (Mr. CASTLE), for working with us in a bipartisan manner.

□ 1515

I urge support of H.R. 2.

Madam Chairman, I reserve the balance of my time.

Mr. GOODLING. Madam Chairman, I yield 6 minutes to the gentleman from Wisconsin (Mr. PETRI) a member of our committee.

Mr. GOODLING. Madam Chairman, will the gentleman yield?

Mr. PETRI. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. Madam Chairman, I just wanted to indicate that we want to make sure that all the school districts know that the next time we test them, they have to test all children. We do not want any of this nonsense of pulling people out to show that they have improved. The Department is now investigating that issue, as a matter of fact.

Mr. PETRI. Madam Chairman, I rise in support of this bill. It is a great credit to our chairman, the gentleman from Pennsylvania (Mr. GOODLING); our ranking member, the gentleman from Missouri (Mr. CLAY); the subcommittee chairman, the gentleman from Delaware (Mr. CASTLE); and, of course, the gentleman from Michigan (Mr. KILDEE). It is a great tribute to all of them that the bill passed our committee with an overwhelming vote of 42-6.

The Student Results Act was put together with four principles in mind: Quality, accountability, choice, and flexibility. It contains several noteworthy provisions.

For the first time, it encourages public school choice, at least in those situations that cry out for it most. The public school choice provision is a simple concept. Children should not be forced to attend failing schools.

One of the problems in education today is that some students, especially many of those participating in Title I programs, are trapped in substandard schools without a way out. The bill allows children attending schools classified consistently as low performing to be given the opportunity to attend a higher quality public school in the area. And if there is no such school in the area, then the school district is authorized to work out a school choice program with another school or schools in a neighboring school district.

Surely, if we cannot fix our worst schools, we should give their students a way out, at least to a better school. Failure to do that is completely unfair

to those children and robs our Nation of the contributions they could make if their talents were better developed.

Although Title I has traditionally tried to engage parents in the education of their children through measures such as parental compacts and formal parental involvement policies, I am pleased to note that there are new provisions in H.R. 2 that attempt to address this issue better.

A significant parental empowerment provision is the annual State academic reports on schools and the school district reports. Through these report cards and annual State reports, H.R. 2 makes available to parents information on the academic quality of Title I schools.

Among other things, such information would include test scores at the school as compared to other Title I schools in the district.

H.R. 2 would also require school districts to make available upon request information regarding the qualifications of the Title I student's classroom teachers, including such information as whether the teacher has met State qualifications and licensing criteria for the grade levels and subject areas in which he or she provides instruction.

In an effort to provide a higher caliber of teachers, H.R. 2 also places a freeze on the number of teacher aides that can be hired with Title I funds. For those aides employed with such funds, the bill increases the minimum qualifications that must be met by all teacher aides within 3 years.

Finally, the bill attempts to reward excellence by giving States the option of setting aside up to 30 percent of all new Title I funding to provide cash rewards to schools that make substantial progress in closing achievement gaps between students.

Madam Chairman, when it comes down to it, this is what we are attempting to do. Not only must we improve all our schools, it is especially vital to close the achievement gaps between them and to find ways for low-income students to have equal access to high-quality education.

This bill makes positive steps in that direction; and, therefore, I am pleased to support it.

Mr. CLAY. Madam Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. KILDEE).

Mr. KILDEE. Madam Chairman, I thank the ranking member for yielding me the time.

Madam Chairman, since last spring, our staffs have been working on the reauthorization of this bill. I am pleased that we have finally been able to put forth the reauthorization proposal that establishes a strong foundation for student achievement as we enter the 21st century. During these negotiations, I believe that we have created a balance between the priorities of both parties. Several of the bill's provisions are worthy of mention.

With regard to Title I, the amendment maintains and preserves many of the core advances that the last reauthorization of ESEA in 1994 instituted. Preserved are the requirements for State education reform, based on challenging standards and aligned assessments. Preserved are Title I's targeting of resources to high poverty school districts and schools.

Most importantly, I believe, the strong accountability requirements we have maintained and added to Title I are very critical. Among them are disaggregation of data based on at-risk populations, increased teacher quality requirements, and a focus on turning around failing schools through the investment of additional help and resources.

We can no longer tolerate low-performing schools that place the education of our children at risk. This means that States and school districts will need to provide substantive intervention to help the students of low-performing schools reach high standards.

If schools are still failing after substantive intervention and assistance, then consequences must and should exist. This bill will accomplish this feat.

I will also be supporting the Mink-Morella-Woolsey-Sanchez amendment to restore the Women's Education Equity Act, or WEEA. This act plays a critical role in providing leadership in women's issues. For too long, I have seen the inequities that exist between the genders, especially in fields that produce high economic returns: technology, mathematics, and science.

I am troubled that the base legislation does not include this important program. I urge Members on both sides of the aisle to adopt this amendment.

I also want to express my appreciation to the gentleman from Pennsylvania (Chairman GOODLING) and the gentleman from Arizona (Mr. SALMON) for working with me to modify the parental consent provisions of this legislation.

These modifications, which are included in the Goodling manager's amendment, will ensure that limited-English proficient students do not go without educational services. And while this compromise is not perfect, I intend to support it.

I want to thank the ranking gentleman from Missouri (Mr. CLAY), the gentleman from California (Mr. MILLER), the gentleman from Pennsylvania (Chairman GOODLING), and the gentleman from Delaware (Chairman CASTLE) for their hard work on this bill.

Madam Chairman, I yield back the balance of my time.

Mr. GOODLING. Madam Chairman, I yield 2 minutes to the gentleman from Nebraska (Mr. BARRETT), another important member of the committee.

Mr. BARRETT of Nebraska. Madam Chairman, I thank my chairman for yielding me the time.

Madam Chairman, I rise certainly in strong support of H.R. 2 today. This bill's renewed emphasis on accountability, local initiative, and student performance provides a very strong foundation for our Nation's schools as we move into the 21st century.

I am particularly pleased with provisions found in Title VI that address the needs of small, rural schools based on a bill I introduced this past summer, the Rural Education Initiative Act, H.R. 2725.

Over 20 percent of the students in this country attend small, rural schools; and many of these schools, of course, are found in my Nebraska district.

For the most part, these schools offer students excellent educations and many benefits, including small classes, personal attention, strong family and community involvement. However, until now, the Federal formula grant programs have not addressed some of the unique funding needs of these districts because they do not produce enough revenue to carry out the program that the grant is intended to fund.

The rural education initiative in H.R. 2 is completely optional. However, if a school district chooses to participate in exchange for strong accountability, the rural provisions will allow a small rural school district with fewer than 600 students to flex the small amounts that they receive from selected Federal formula grants into a lump sum and then receive a supplemental grant. No school district would receive less than \$20,000. And to these very small districts, this can make a huge difference.

The rural education initiative has broad bipartisan support and has been endorsed by over 80 education organizations including the National Education Association and the Association of School Administrators. It does provide a common-sense approach to using Federal dollars in the way that Congress intended, that is, to ensure all students, regardless of their background, have the opportunity to receive a high-quality education.

I encourage support for the program and, of course, for the passage of H.R. 2.

Mr. CLAY. Madam Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. KIND).

Mr. KIND. Madam Chairman, I thank the ranking member for yielding me the time.

Madam Chairman, I rise in strong support of H.R. 2. It is a good bill I think we can support with bipartisan effort today. But it can be better. And it can also be made worse.

It can be better by the acceptance, I feel, of some crucial amendments that will be offered later today, one of which will be offered by the gentleman from California (Ms. WOOLSEY), the gentlewoman from Hawaii (Mrs.

MINK), and the gentlewoman from California (Ms. SANCHEZ) on gender equity issues; one by the gentleman from Indiana (Mr. ROEMER) which will increase the authorization level of this program by \$1.5 billion.

But it is also a bill that can be made worse through a variety of amendments that may also be offered, one of which is the portability amendment, which I think given the roughly per capita \$600 share that a student receives under Title I funding really does not go that far if it is attached as a voucher or portability type of provision rather than a targeted one.

This week, we had over 350 students from around the country come to our Nation's Capitol to have a serious discussion about school violence. One of the common refrains that I have heard in speaking to a lot of the students which are from western Wisconsin is that we here at the Federal level and the State legislatures have an obligation to ensure that all the students in the country receive a quality education regardless of the wealth of their community, regardless of their own socioeconomic background.

And in essence, in a nutshell, that is what the Elementary and Secondary Education Act was really geared to do over the last 35 years and specifically the Title I funding.

The Federal role in K-12 public education is relatively small, roughly 6 or 7 percent of the total spending that is going on out there, but it is a very important role because of the targeted nature in the limited funds in this bill, roughly \$8.3 billion. It is targeted more to the disadvantaged, lower-income students in our school system. And because of that, we are able to leverage the money to get a bigger bang out of the buck.

I am concerned with the directions that some of the amendments will go to as far as vouchers, portability that would dilute that leverage effect on the quality of education.

I certainly hope that after today's debate and the amendment process that we go through and, hopefully, at the conclusion when we receive bipartisan support that we do not take up another measure tomorrow, referred to as "Straight A's" that would effectively blow up everything that we do in essence today by just block-granting all the money back to the States, and we would lose that crucial targeted priority effect that we currently have right now in Title I funding.

But one component of the bill I want to speak on, and I want to commend the gentleman from Nebraska (Mr. BARRETT) in this regard, and that is the rural school initiative. We have got some changes in Title X funding that targets rural schools because of the unique nature that they always face and the challenges that they face, the isolated nature, the difficulty in re-

cruiting teachers and administrators, the difficulty of them to join professional partnerships, consortiums for professional development purposes.

What the rural school initiative will do is add greater flexibility, along with some accountability provisions, to give them more leeway in targeting this money and how best they can use it to get the best results in rural school districts.

So I commend both the chairman and the ranking member for the efforts that they have put into it and the ranking members on the subcommittee that truly believe that this is a good bipartisan bill that, hopefully, at the end of the day, will receive all of our support.

Mr. GOODLING. Madam Chairman, I yield 4 minutes to the gentleman from Georgia (Mr. ISAKSON), our newest member on the committee.

Mr. ISAKSON. Madam Chairman, I thank the chairman for yielding me the time.

Madam Chairman, I would like to also address this House on a point, as a new Member, which I would like to make from the outset. I want to thank the chairman for his time and his dedication to allow all sides to have their way in committee and have their say. I want to thank the gentleman from Missouri (Mr. CLAY) for the amount of time that he put in and the amount that he afforded to all of us, and the gentleman from Delaware (Mr. CASTLE), the subcommittee chairman, and the gentleman from Michigan (Mr. KILDEE) as well.

My purpose in rising to speak on this is because I have had the unique opportunity during the past 2 years in Georgia before I came to Congress to be the recipient of Title I funds as chairman of the State Board of Education to see actually what happened with Title I funds and to see actually what the effect of Federal regulations and lack of flexibility in some cases or lack of direction in others or in some cases too much direction really did.

□ 1530

All of us have been frustrated that this program, which is targeted to the most needy in our country, never seemed to bring about the results that we had hoped for. I think the gentleman from Pennsylvania's efforts and the efforts of the committee in this bill, which I sincerely hope this House will pass in an overwhelming and bipartisan fashion, will bring about results, and I do so for four specific reasons:

Number one, for the first time these funds go to systems and accountability is required in return. For the first time we are going to measure the response of systems in terms of the effectiveness of the use of this money in Title I, our most disadvantaged students.

Number two, one of the most difficult problems in public education in dealing

with Title I students is having the transportation necessary sometimes to move those students to the best possible school. Under the leadership of the gentleman from Pennsylvania, the school choice in this bill within the school district itself allows local superintendents to use Title I funds for the transportation of a Title I student out of one school to any other school regardless of the percentage of Title I students in that school. Environment oftentimes can be the main change in a child's attitude and in a child's learning ability, and the leadership of the gentleman from Pennsylvania in providing this is essential.

Third, the reduction from the 50 percent requirement to the 40 percent requirement in terms of percentage of Title I students in order to use funds for a schoolwide project is essential. I found in committee there was a little bit of a lack of understanding about what a schoolwide project is. A schoolwide project is the ability to take Title I funds, merge them with other funds, State, local and in some cases Federal, and use them in a broad-based program in the school that benefits all students. The reason this is important to Title I is as follows, and I want to use some very specific examples.

In our youngest children, in kindergarten and in first grade, basic things like eye-hand coordination and team building programs necessary in the building blocks of learning are essential to involve not only children who are disadvantaged but children who may not fall in that category, because kids learn by example. And a schoolwide program allows money to be merged, money to be enhanced and kids to be put together in that learning experience. A second example is reading. To assume that all money should be targeted in Title I outside of a schoolwide project or with an overwhelmingly high requirement means that you lose the ability to merge those disadvantaged children with more advantaged children in the process of reading. In kindergarten through third grade, the most essential thing we can do in America's schools is improve the reading ability and reading comprehension of our children. This move by widening the ability to use funds and merge them for schoolwide programs and by lowering the threshold from 50 percent to 40 percent is going to ensure that those children most in need of better education also are exposed more to programs that involve those children who are already performing.

I rise to support the chairman, the ranking member and the committee and urge this House to pass the reauthorization of ESEA.

Mr. CLAY. Madam Chairman, I yield 4 minutes to the gentleman from California (Mr. GEORGE MILLER).

Mr. GEORGE MILLER of California. Madam Chairman, I want to thank the gentleman for yielding me this time, and I want to thank him and the gentleman from Pennsylvania for all their work on this legislation. The gentleman from Missouri (Mr. CLAY) and the gentleman from Pennsylvania (Mr. GOODLING) put in a lot of hours as have the gentleman from Delaware (Mr. CASTLE) and the gentleman from Michigan (Mr. KILDEE) who have really carried the bulk of the work around this legislation. But I think we had an opportunity in the markup of this legislation for all members to participate, and I think it was one of our better hours in this committee. I also want to thank the gentleman from Georgia (Mr. ISAKSON) who just spoke because of his willingness to sift through many hours of hearings and also the markup and contribute, I think, a unique perspective to some of the deliberations that we were having about this legislation and the impacts of some of the things that we wanted to do on local districts.

The Federal Government has spent roughly \$120 billion over the last three decades funding this program and the results have been mixed. We have closed the gap to some extent between rich and poor, majority and minority students, but the gap remains wide and it remains open. We ought to see in this legislation if in fact we can close that gap, and I think that this legislation has a chance of finishing the job.

In return for our investment over the next 5 years of \$40 to \$50 billion, we are asking that the States measure the performance of all students and that it set goals of closing the gap of achievement between majority and minority and the rich and poor students; we ask that children be taught by fully qualified teachers; we ask that schools and teachers be recognized and rewarded for their successes in improving student achievement; and that parents be given clear and accurate information about their child's educational progress and about the quality of their schools. And what we ask most of all in this bill is that we educate all children, each and every child, that no child is left behind. This can be done, it has been our rhetoric for 20 years, but it has not been what is happening in the classroom and it has not been what is happening on the ground.

We understand now that all children can learn. We have enough information to fully understand that children from disadvantaged backgrounds can learn as well as children from the suburbs and elsewhere. If we set standards, if we have high expectations of those students, we now know that that kind of success is possible. But we must have those expectations of success and we must have qualified teachers and we must monitor the achievement. It can be done.

Just this last week, we learned that it happened again in the State of Texas where this same kind of decision that we are making here today was made in Texas under the leadership of everybody from Ross Perot to Ann Richards to George W. Bush. We learned last week that in Houston and Fort Worth, the gap was closed between majority and minority students, that in fact the achievement was coming closer together. We have seen it in Kentucky where many schools achieving the highest scores last year in reading and writing were in high poverty schools, in the South Bronx in the KIPP Academy, once again where we ask students to achieve high standards, where we have the expectations that they can achieve and we put them together with qualified teachers and good curriculum, those children in fact throw aside mediocrity, they throw aside the failure and they achieve as our expectations are in this country for all of our children.

I believe that this legislation starts that process on a national scale. I believe that we can have qualified teachers in all classrooms, that we can have these expectations of our young children and they can meet those standards of achievement and we can have rich and poor children, majority and minority children learning at the same rate. But we will have to hold on to these standards as this bill continues to progress. I think we continue to need to provide additional funding and there will be amendments that address that, because one of the things we know about this system is it is, in fact, resource poor. But we will get to that later in the deliberations on this legislation.

I want to thank every member of the committee and especially the committee chair and the ranking member and the subcommittee chair and the ranking member. This was long hours of negotiations, some of which went on until this morning, I guess, over some of this legislation. I want to thank the staff on both sides for all of their effort.

Mr. GOODLING. Madam Chairman, I yield 3 minutes to the gentleman from Texas (Mr. PAUL), another member of our committee.

Mr. PAUL. Madam Chairman, I thank the gentleman for yielding me this time.

Madam Chairman, I rise in opposition to this legislation. I know that the goal of everyone here is to have quality education for everyone in this country. I do not like the approach. The approach has been going on for 30 years with us here in the Congress at the national level controlling and financing education. But the evidence is pretty clear there has been no success. It is really a total failure. Yet the money goes up continuously. This year it is an 8 percent increase for Title I over last year.

In 1963, the Federal Government spent less than \$900,000 on education programs. This year, if we add up all the programs, it is over \$60 billion. Where is the evidence? The scores keep going down. The violence keeps going up. We cannot keep drugs out of the schools. There is no evidence that our approach to education is working.

I just ask my colleagues to think about whether or not we should continue on this same course. I know the chairman of the committee has made a concerted effort in trying to get more local control over the schools, and I think this is commendable. I think there should be more local control. But I am also convinced that once the money comes from Washington, you really never can deliver the control back to the local authorities. So that we should give it serious thought on whether or not this approach is correct.

Now, I know it is not a very powerful argument, but I might just point out that if Members read carefully the doctrine of enumerated powers, we find that it does not mention that we have the authority, but I concede that we have gotten around that for more than 35 years so we are not likely to reconsider that today. But as far as the practicality goes, we should rethink it.

If we had a tremendous success with our educational system, if everybody was being taken care of, if these \$60 billion were really doing the job, if we were not having the violence and the drugs in the school, maybe you could say, well, let us change the Constitution or let me reassess my position. But I think we are on weak grounds if we think we can continue to do this.

There are more mandates in this bill. Even though we like to talk about local control, there are more mandates, and this bill will authorize not only the \$8 billion and an 8 percent increase this year, but over the next 5 years there will be an additional \$28 billion added to the budget because of this particular piece of legislation.

I ask my colleagues, give it serious thought. This does not deserve passage.

Mr. CLAY. Madam Chairman, I yield 3 minutes to the gentleman from New Jersey (Mr. ANDREWS).

Mr. ANDREWS. Madam Chairman, I thank the gentleman for yielding me this time. I rise as a graduate of and a believer in American public schools to support this legislation. I think there is a broad consensus among the Members of this Congress that a very top priority is that we improve our public schools. Our employers are asking for it, our parents are asking for it, our students and our teachers are asking for it, and I believe this legislation takes an important step in that direction.

I commend the gentleman from Pennsylvania (Mr. GOODLING) and the gentleman from Missouri (Mr. CLAY),

the gentleman from Delaware (Mr. CASTLE) and the gentleman from Michigan (Mr. KILDEE) for their excellent bipartisan cooperation in bringing this legislation to the floor. I think we should do more, and I hope that before we adjourn for the year, we find it in our agenda to enact the President's class size reduction initiative and put 100,000 qualified teachers in America's classrooms. I hope that we enact for the first time a meaningful Federal program to assist in the construction and reconstruction of our crumbling schools. But I think this legislation is an important step in the right direction.

It is important for what it does, by placing tutors and learning materials and new opportunities in the hands of the children who are least likely to have those opportunities without this law. As the gentleman from Wisconsin (Mr. KIND) said, it is important for what it does not do, because it does not take us down the false promise path of vouchers and the privatization of our public schools. I commend the leaders of our committee for reaching that delicate balance.

I would also like to thank the leaders of the committee for including in this bill two initiatives which I have sponsored and supported, one which attempts to stem the tide of school violence that we have seen in this country by the enactment of peer mediation programs that help young people work out their differences among themselves. I also thank the leadership for their inclusion of an effort that the gentleman from Indiana (Mr. SOUDER) and I have worked on to promote the education of young people in entrepreneurship, so that young people may learn ways that they may build businesses into successes to pay taxes to support our public school system.

I will be offering an amendment later today which attempts to give local educators a new tool to expand the benefits of the ESEA to preschoolers, to 3-, 4- and 5-year-olds who are not yet in kindergarten. There is no rule that says that we should wait until our children are 5 years old before they start to learn. They sure do not wait until they are 5 years old. I believe that my amendment will liberate the resources of this bill to help local school decisionmakers make prekindergarten programs a more viable success in the future.

I would urge my Republican and Democratic colleagues to step forward, show the country that we can act together for the benefit of America's education and pass this bill.

Mr. GOODLING. Madam Chairman, I yield 3 minutes to the gentleman from Texas (Mr. SAM JOHNSON).

Mr. SAM JOHNSON of Texas. Madam Chairman, education is about providing our children with the tools they need to get a good education, like flexi-

bility, accountability and choice. After 30 years and \$120 billion, Washington needs to realize it is not how much you spend but what you spend it on that counts.

For too long, we have spent money educating bureaucrats in regulation, red tape and Federal control. But now we are returning control and flexibility to the States while at the same time demanding more accountability for your tax dollars.

□ 1545

I am especially proud that many of the reforms provided in this bill are mirrored after the efforts of my home State of Texas. Under the proven leadership of Governor George Bush, Texas has become the model for school accountability and student achievement. In fact, the 1998 national assessment of education progress recently reported that eighth grade students in Texas scored higher on average than the entire Nation in writing skills.

Madam Chairman, this proves once and for all that giving the States, teachers, and parents greater control over their children's education works. That is what this Congress is doing today.

Mr. CLAY. Madam Chairman, I yield 3½ minutes to the gentleman from Indiana (Mr. ROEMER).

Mr. ROEMER. Madam Chairman, I rise, first of all, to commend the gentleman from Pennsylvania (Mr. GOODLING) and the gentleman from Delaware (Mr. CASTLE) and my ranking members on the Democrat side, the gentleman from Missouri (Mr. CLAY) and the gentleman from Michigan (Mr. KILDEE), for crafting, I think, very significant and important bipartisan education legislation that will hopefully be signed by the President of the United States into law. That is a difficult task today in Washington.

I also want to talk about three parts of this bill. First of all, who, who does this bill help; secondly, what do we do to help those children; and, thirdly, why, why might we need to do more through the amendment process?

First of all: Who?

This is the title I bill for education that is targeted at the children who are most likely to drop out of our Nation's schools and possibly get into trouble, crime-related trouble. This is legislation targeted at children that are eligible for free and reduced lunches that oftentimes get their only hot meal at school. This is targeted at children who are below the poverty line, children that are in families making less than \$16,600 per year. That is who we are trying to help. I think it is the most important thing that we can do in a bipartisan way as Members of Congress.

Now what do we do in this legislation? Well, with the majority, some in the majority's help, and with the minority's help I attached an amendment

in committee to broaden public school choice to give parents more choice as to where they send their children to school and hopefully not wait until the school fails and hopefully share good ideas. If Indiana has a good idea in public school choice, let us share it with Wisconsin and California.

We have report cards in this legislation to share academic and report academic progress. We have teacher certification by the year 2003. We have school-wide projects.

So, many good things, but it is not enough. What else do we need to do and why?

I will be offering an amendment to increase title I funds by 1.5 billion more dollars. I will offer that as the Roemer-Quinn-Kelly and Etheridge amendment, two Democrats and two Republicans. Why do we need to do that? Because of the strength of this bill. We put a good Republican-Democrat bill together that does require more from para-professionals, that does require more from teachers, that is not fully funded. We need \$18 billion more to fully fund this bill to get to every eligible child. Let us make sure we have this bill have the opportunity to work. I ask for bipartisan support for that amendment.

To paraphrase President Kennedy, if not now, when for these poorest children; and if not for the poorest, the most disadvantaged and the most needy, who should we help in this society? Let us pass this bipartisan amendment to increase funding for the most needy, the poorest, and the most disadvantaged children.

Mr. GOODLING. Madam Chairman, I yield 3½ minutes to the distinguished gentleman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. Madam Chairman, I certainly rise in strong support of this bill, and as a member of the Committee on Education and the Workforce, I was really proud to see that we came together across the aisle on the committee and by a vote of 42 to 6 demonstrating that there is genuine and real evidence that on a bipartisan basis we can do what is right for the American people and for these children, children who are our future, and that is not just silly rhetoric; but we are facing a new millennium. I mean it genuinely. We are doing this for the children who are the future, and I think it is most important for me from my side of the aisle and in something that I have learned over the years, whether I was in the Parent/Teacher Association or a member of the Board of Education or someone on the committee, that we are really focusing on student achievement, because that is what this is all about, and not filling out the right forms and not supporting more red tape and regulation, but making sure that the Government's program, that our dollars are really going for quality

programs, academic accountability, and local flexibility.

That is something I believe deeply in, local control and the flexibility.

I think that the most important thing is that we recognize that all States, school districts and schools should be held accountable for ensuring that students are raising their standards of academic accountability. Otherwise, why are we giving out more money into the classrooms? And the reports that will be issued to the parents and the community on student achievement and teacher qualifications, which is another component of this bill, all will be indicators of quality schools.

I think that one of the most important things in the bill to stress again in another way is that we are sending dollars to the classroom and less dollars for bureaucracy, and to state it with precision. Ninety-five percent of the funds in this bill, as prescribed, will go to the classroom and very limited amount for State or local bureaucracies and reporting requirements.

I think the thing that we must understand is that we are basing our instructional practices on the most current and proven research, and we are not using them as incentives for more trendy fads or more experimentation, but we want proven results and proven research to be funded.

Then I guess finally I must say, and I hope that this will prove to be the case in the implementation of this legislation, that parent involvement will be an essential component of this title I legislation. Parents must be notified if their children are failing or if their schools are failing, and so we are including parents.

As a former teacher and a mother, I just want to say, and I think my colleagues know this, but I want to stress it, I am not speaking out of theory here, but I am a former school teacher, a mother of three who went and graduated from public schools and also a school board member, and I know firsthand that State and local school districts will use that flexibility to build better schools and to ensure accountability and higher achievement levels, and I think that is what we owe this country as we face the new millennium.

Mr. CLAY. Madam Chairman, I yield 2 minutes to the gentleman from Massachusetts (Mr. TIERNEY).

Mr. TIERNEY. Madam Chairman, I also want to add my congratulations to the chairman and to the ranking members for their good work in putting together a bill that moves us forward on the work that was begun in 1994, the idea of having a bill that gives all students the best chance to have the kind of education that we want our children to have.

This bill focuses on accountability. It allows us to determine the academic

progress based on disaggregated information so that we can assure that every student, majority and minority, whether they are rich or they are poor, are getting the kind of improvement and the kind of success that we want them to have in our public educational system. The bill allows for reporting to parents so that they know that the teachers are qualified and that their children are getting the kind of attention that they want, and they get to measure the performance of their schools so they can make decisions about where they send their children.

This would allow us for the first time to define and require fully qualified teachers; and when put together with other legislation this committee has passed this year, it allows us to make sure that we give teachers the kind of support they need to be the very best. We are providing for mentoring; we are providing for good professional development, and that moves the whole system across because the most important thing, of course, is a qualified teacher in every classroom.

We need to know that this bill also authorizes, it brings from a demonstration program to a fully authorized program the comprehensive school reform that allows schools to get sufficient moneys, to look out and see what programs are research based, proven effective, for that school to implement for a curriculum with standards that can be measured that brings in the parents, brings in volunteers, and brings in the kind of work that we need in our schools and gives them the flexibility of putting together a program to lift that entire school from literacy right through to every other subject and focus where they know that school needs the most attention.

This is a bill that is worth supporting but still needs some attention, and we hope that before we wrap this up we will look at passing the bill of the gentleman from Pennsylvania (Mr. FATTAH). I am going to join the gentleman from Pennsylvania in an amendment that will make sure that all of the services the children get are comparable, that they have equal access to quality teachers, curriculum, and learning resources.

With those things done, Madam Chairman, it is a good bill, and we would urge support.

Mr. GOODLING. Madam Chairman, I yield 2½ minutes to the gentleman from Kentucky (Mr. FLETCHER), another new member on the committee.

Mr. FLETCHER. Madam Chairman, I rise to speak in support of the Student Results Act of 1999, the reauthorization of the Elementary and Secondary Education Act, and certainly laud the gentleman from Pennsylvania (Mr. GOODLING) for all of his work along with the ranking member in this bipartisan effort.

Now the education of our children is one of our greatest responsibilities, and

this bill is about children that often are born and know only poverty and failure. It is based on some very important principles, the first being accountability and rewards. For about 34 years we spent \$120 billion on programs in title I to help those disadvantaged students, and yet we have not seen the kind of results that we should have seen spending taxpayers' money to that degree. But we have a bill here now that gives that money and holds the students and the teachers, the local education administration, accountable. Certainly it empowers them, but it also has the kind of accountability that we can ensure that those students show improvement like we have seen in many other States.

Flexibility is another important principle here with local control. It allows local teachers, parents, and local education administrators to really use the resources that match the local needs. A one-size-fits all does not work. The needs of my home State differ even within my own district in different counties, and I think this bill gives the kind of flexibility that is needed.

Thirdly, it gives choice. It gives disadvantaged students the choice of public schools; and with this choice, I think it renews hope to those students. As my colleagues know, some schools in some areas, we could put a banner over them and say that all who enter, abandon hope, because they have continued to operate without empowering the students, without showing the students that they can improve, without giving them what they need; and yet this bill gives those students when schools fail to have a choice to go to another school, not to be robbed of hope, but to enter a school where they can be taught and mentored.

It also empowers teachers. It also gives the students the hope of having a mentor or a teacher that is well trained, that is capable, as well as the classroom aides that have the kind of instruction and training that they need.

□ 1600

I am very glad to stand and speak in support of this bill and the work that the gentleman from Pennsylvania (Mr. GOODLING), the chairman of the committee, has done, and I certainly laud him. I am thankful for the opportunity to work on the committee.

Again, the education of our children is one of our greatest responsibilities. I think this bill moves us in the direction of giving more local control and restoring hope to children.

Mr. CLAY. Madam Chairman, I yield 3½ minutes to the gentleman from New York (Mr. OWENS).

Mr. OWENS. Madam Chairman, I would like to join in the celebration of bipartisanship on this bill. However, I think it is too early to celebrate, and we have to look at the context in

which this bill is being offered today. It is being offered in a context where we have already this year passed an Ed-Flex bill which set the stage for giving a great deal of power and decision-making authority to the governors. Tomorrow or next week, we are going to be considering something called a Straight As bill, which is going to wipe out most of what we say today about the Title I concentration on the poorest youngsters in America.

Within this context, we have to consider what we are doing today. When they move today to take the first step as sort of a guerilla, beachhead action, we are going to reduce the concentration required of poverty youngsters in a school from 50 percent to 40 percent, and this bill is just the beginning.

This bill looks like a status quo bill with just a few innovations here and there, and a little increase, but it is setting the stage for something very different. I would certainly be quite happy if we could leave it up to our leadership on the Committee on Education and the Workforce. The people there have the institutional memory, and they have the dedication to education. We could do a great job if we did not have these overriding forces of the majority of the Republicans here who are pushing still to minimize the role of the Federal Government in education. One way or another they are going to do that, and the stage is being set today for the block grant. By reducing the thresholds from 50 percent to 40 percent, that is the first stage, and then the Straight As bill will come along and it will push out the decision-making of the Federal Government to a great degree and hand it over to the States. We are moving toward a block grant rapidly. The Senate, the other body, has a bill which is probably going to lead up to that block grant and move us in a direction that we do not want to go.

I have several amendments that I will introduce later dealing with innovative programs which I think we should undertake at this time. This should not be a status quo bill. At a time when the United States is at peace and with unprecedented prosperity, we should be taking a great leap forward in education. This bill, which is going to be our reauthorization for 5 years, ought to be an omnibus-cyber-civilization education program to guarantee the brain power and leadership that we need in our present and for our expanding and future digitalized economy in a high-tech world.

This Congress should take that step now. At the heart of this kind of an initiative, we should set the important revitalization of the infrastructure of our schools. That is, we should have a major program in this bill. It is germane. It is possible that in this bill we could have a program for school construction. I will be introducing an

amendment which calls for a 25 percent increase in the Title I funding for health, safety and security improvements in infrastructure.

I will also introduce an amendment for training paraprofessionals. That is the best source of teachers, and we have a shortage now and one that is going to get worse. The source for new teachers is paraprofessionals. Also, I will offer an amendment for an increase to train and develop staff for technology.

We should not be content with the status quo. We should not accept the leadership outside of the Committee on Education and the Workforce which wants us to do the least possible and to turn over the role and authority of the Federal Government to somebody else. We should push for what the American voters demand, and that is a major innovative, creative approach to the improvement of education.

Mr. GOODLING. Madam Chairman, could I inquire as to the division of time.

The Chairman pro tempore (Mrs. EMERSON). The gentleman from Pennsylvania (Mr. GOODLING) has 17½ minutes remaining, and the gentleman from Missouri (Mr. CLAY) has 19½ minutes remaining.

Mr. CLAY. Madam Chairman, I yield 3 minutes to the gentleman from Tennessee (Mr. FORD).

Mr. FORD. Madam Chairman, I thank my colleague for yielding me this time. I want to congratulate all of the members on the Committee on Education and the Workforce for all of their hard work, certainly the gentleman from Michigan (Mr. KILDEE) and the gentleman from California (Mr. MCKEON) and to all of the chairs and ranking members who worked so hard and diligently to provide us here in the Congress with something that all of us could be proud of and something that all of us could vote for.

Title I, Madam Chairman, as you know, is our Nation's educational safety net. In 1999 and 2000, the State of Tennessee's public schools will receive more than \$130 million in Title I funding. These resources play a vital role in helping to keep poor schools or schools with a high percentage of poor students on a fiscal par with wealthy ones. Our responsibility is to ensure that these dollars drive better performance. This bill seeks to do that. This year, the Memphis City school system, which is in my district, received a Title I grant of approximately \$27 million. This grant fully funds 114 schools which have a poverty index of at least 70 percent.

Our challenge, as we consider legislation today that would authorize nearly \$10 billion in programs for the Nation's low-income students, is to reverse the quality drain in our public schools and prepare every child for the 21st century marketplace. As important as Title I is

to my district and State and Nation, Madam Chairman, we must recognize that it is not perfect.

Three principles should guide our deliberations: investment, quality, and accountability. We must acknowledge Title I shortcomings and look to it for the 21st century, but we must resist the extremist impulse to gut the Federal role in support of our neediest students. We must focus our limited Federal education dollars on policies and practices that work to raise teacher achievement and improve teacher quality. Unfortunately, we will consider something very soon, a Straight As proposal that will not quite bring the bipartisanship and the cooperation and really the comity that we see pervading this debate right now, because quite frankly, many of us on this side of the aisle believe that Straight As guts many of the accountability provisions and, quite frankly, does not direct and channel the resources to those students who need it most.

With regard to the reauthorization of this ESEA, what we need to do, it means allowing school districts to establish pre-K education programs; helping to equalize per pupil expenditures across States; providing parents and communities with valuable information about the qualifications of their teachers; training teachers that use technology in Title I schools; providing violence prevention training and early childhood and education programs, and ensuring gender equity.

Madam Chairman, as we proceed with this debate, I believe it is imperative that we understand the direct connection between enhancing Title I and broader goals in our society. When I travel around my district and my State, principals describe for me the importance of providing all children with opportunities early and often. Principals and teachers recognize that if we fail to serve these children, we will see not only low achievement, but higher dropout rates. They know firsthand that this results in higher rates of incarceration and in lower overall levels of productivity.

It is important to note that here in this body and State legislative bodies around the Nation, no one objects when we talk about building new prisons. No one objects to constructing new prison cells. We have an opportunity now to expand opportunities in the classroom. I support my colleagues on the Republican aisle and my colleagues on the Democratic aisle. We are ready to support this bill and move forward.

Mr. GOODLING. Madam Chairman, I yield 3 minutes to the gentleman from Delaware (Mr. CASTLE), a member of the committee.

Mr. CASTLE. Madam Chairman, I rise in strong support of H.R. 2, the Student Results Act, a bill to authorize a number of special population programs under the Elementary and Sec-

ondary Education Act. H.R. 2 renews most importantly the Title I program, our Federal commitment to help our most disadvantaged children achieve equal education opportunity.

Since its inception in 1965, Congress has recognized the importance of the Title I program and has sought to strengthen it. Today, the purpose of Title I is to narrow gaps in academic achievement and help all students meet high academic standards. Yet, without clear performance measures and real accountability, Title I will do little to positively impact student achievement.

With the help of the gentleman from Missouri (Mr. CLAY); the gentleman from Michigan (Mr. KILDEE); and the gentleman from Pennsylvania (Mr. GOODLING), the chairman of the committee; a lot of very good steps are included in this bill; and for that we should all be thankful.

H.R. 2 maintains State content and performance standards; and, for the first time, sets a date certain for the implementation of State student performance assessments. These standards and assessments, which were first established during the 1994 reauthorization, which was another positive step for Title I, will help States and local districts and schools measure the academic progress of its students and identify those schools in need of assistance.

H.R. 2 also strengthens existing accountability provisions by requiring States, school districts, and schools to report performance data by separate subgroups of students such as those who are economically disadvantaged and limited-English proficient. By encouraging States to make decisions about academic achievement based on disaggregated data, we eliminate averages, which can mask the shortfalls of certain groups and open the door to improvement for all children. And, in addition, H.R. 2 requires States who choose to participate in the Title I program to widely distribute information on the academic performance to parents and the public through report cards or other means. This change will help parents access the information they need to become a full partner in their child's education.

The Student Results Act also ensures that the nearly 75,000 teachers' aides hired with Title I funds are qualified to provide instruction in reading, language arts, and math. Under current law, many of these aides provide direct instruction to our most disadvantaged students and with a minimum of a high school diploma or GED. We freeze the number of teachers' aides that could be hired with Title I funds; and within 3 years, we require all aides to demonstrate the knowledge and ability to assist with instruction based on a local assessment.

Finally, H.R. 2 ensures that no student will be forced to attend a failing

school. Specifically, it requires schools to notify parents of their ability to transfer to another public or charter school as soon as the home school is identified as one in need of school improvement. In addition, the bill makes the existing choice program viable by allowing States, if they so choose, to use Title I funds for transportation.

With new flexibility and new authority to operate school-wide programs, the Student Results Act, when combined with Ed-Flex waivers, makes the Title I program extremely pliable. We challenge all States, school districts, and schools to determine how best to raise the academic standards of all children.

Mr. CLAY. Madam Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. PHELPS).

Mr. PHELPS. Madam Chairman, I want to first commend the chairman and the ranking member for their hard work together in a bipartisan manner to bring to us this important legislation today.

I rise in support of H.R. 2 because it continues to provide the necessary investment in education to the low-income schools that need it the most. At the same time, it ensures that schools must produce results for the assistance they receive.

As a former teacher and the husband of a teacher, I have seen firsthand the benefits investing in our kids can make and how, with quality education, even the poorest of our children can find better opportunities.

I agree that education policy should remain a local issue, and that is why I cosponsored and supported the education flexibility act. But we as a Nation have a responsibility to ensure that no child is left out of the opportunities education provides. That is why I will support this bill because it says that no one will be left behind with substandard education.

Madam Chairman, H.R. 2 focuses this limited Federal role on impoverished students and requires that schools and localities receiving Title I funds are held accountable for student performance. In addition, H.R. 2 ensures that our kids get a quality education with quality instructors. I also cosponsored the rural school initiative that targets the same children and will help us utilize the resources and allow flexibility to reach these same children.

I want to urge my colleagues to remember these children and that we do our best for them and leave no child behind. Vote for H.R. 2.

Mr. GOODLING. Madam Chairman, I yield 4½ minutes to the gentleman from Colorado (Mr. SCHAFER), another member of the committee.

Mr. SCHAFER. Madam Chairman, I thank the gentleman for yielding me this time.

Madam Chairman, a couple of comments that I would like to make. As a

member of the Committee on Education and the Workforce, I sat through the 3½ days of comment and testimony and debate about the bill before us today, and it is with a certain amount of reluctance that I rise to oppose the bill and urge Members to vote against it.

I do so because I have come to the conclusion, one that I think is easy to reach by reading the bill, that this bill, while it proposes to offer more flexibility to States, it actually does quite the opposite. This bill is loaded with new mandates. It is heavy on prescriptions from the Federal Government. And it does so in a program that over the last 30 years has spent some \$120 billion on a program that members of both parties, and in fact, some of the program's strongest advocates have described as a dismal failure.

□ 1615

I would like to read a quote that was issued today describing the bill from former Assistant U.S. Secretary of Education. It says, "The depressing bill on the House floor today suggests that when it comes to Federal education policy it matters not whether or not the Congress is Republican or Democrat. Neither seems to care about the kids. Neither is willing to preserve the status quo. Both are willing to throw good money after bad. This Title I bill is essentially more of the same, which is why the education establishment likes it, why the establishment's cheerleaders in the media have praised it and why it will not do anything good for America's neediest children, though it will continue to pump billions into the pockets of those employed by their failing schools. It perpetuates failed programs, failed reform strategies and a failed conception of the Federal role. To all intents and purposes, Lyndon Johnson is still making Federal education policy, despite 3½ decades of evidence that this approach does not work. A huge opportunity is being wasted. Needy kids are being neglected. The blob is being pacified. States and districts with broken reform strategies are being spurned and the so-called reforms in this package, while not harmful do not amount to a hill of beans. Every important idea for real change has been defeated, though some brave House members are going to try to resuscitate them," and I will end the quote there.

It goes on to talk about tomorrow's debate on Straight A's as an opportunity for real reform and that we should keep our fingers crossed.

The author of that quote, Chester Finn, again a former Assistant U.S. Secretary of Education, is right on the mark, Madam Chairman. We are for accountability. Accountability is a nice topic. It is one that we should be in favor of. This bill takes a bad program, adds \$900 million in new authorization

and proposes to fix this broken system with new Federal controls, new Federal definitions of quality and new Federal prescriptions for change at the local level.

I submit that it will not work, and we should not have any reasonable expectation that it will work. I do not doubt that it makes us feel good here in Washington. From that perspective, this bill certainly satisfies a certain therapeutic need that we may have because we care about these children, and we want to see the dollars get to their classrooms, and we want to see them progress and improve academically. That is a goal to which we all can agree.

The notion that we here in Washington, D.C. can establish new rules, new regulations, new mandates and expect them to take hold in all 50 States, in tens of thousands of school districts, and make some meaningful improvement is the same failed philosophy that this Congress has pursued for decades. This bill truly is more of the same, and I am afraid to say that.

One of the opportunities that we missed is in full portability. If we really believe that the fairness in education should be measured by the relationship between students, we should allow the dollars that are spent in this bill to follow the students when they try to seek the academic opportunity in the best setting, according to their parents' choice.

Mr. CLAY. Madam Chairman, I yield 2 minutes to the gentleman from Texas (Mr. GREEN).

Mr. GREEN of Texas. Madam Chairman, I am glad to follow my colleague, the gentleman from Colorado (Mr. SCHAFER), because obviously I support the bill generally; but I had some concern about the committee mark, and I am told that it has been corrected in dealing with limited English proficient children under title I. The concern I had was a parent would actually have to give permission for their children to be in a bilingual program or even be in title I if they were limited in English proficiency.

I do not have any problem with parents being able to take their children out of a program, but to get that parent's permission before, and the wife that is a schoolteacher, oftentimes they do not have the correct address sometimes and the teachers are the ones that are going to have to follow up on making sure that parent gives that permission; and it is the children who will be in a no-man's land for a period of time. I know the manager's amendment, I think, corrected it where that child will be in that program and if the parent wants to remove them that is fine because it ought to always be the parent's decision.

In fact, that is the way the practice is today because in my own district children say they do not want their

children in bilingual, and it is not that difficult to remove them from that if the parent wants it.

The bill overall is very good. In fact, even in the administration statement where it said that in supporting the bill that the House should change or should delete the provisions that would require parental consent for title I services and jeopardize student access to the full title I benefit and opportunities of the high standards and, again, I think the manager amendment has done that and I congratulate both the chairman and the ranking member and the committee for being able to do that, because I have been in every public school in my district. I have watched bilingual programs work, and they do work. Students do not stay in there for their full life. They stay in there typically 2 to 4 years, depending on the students.

Although I have to admit I was in a kindergarten class a few years ago, went to that class in September when they were first bilingual, went back in May and those children were speaking English. I read to them first in September in Spanish, and when I went back in May they were speaking English; and I read them an English book.

So it works. That is what we need to make sure that we continue that.

Mr. GOODLING. Madam Chairman, I yield 4 minutes to the gentleman from Michigan (Mr. HOEKSTRA), another member of the committee, a subcommittee chair.

Mr. HOEKSTRA. Madam Chairman, I thank the chairman, the gentleman from Pennsylvania (Mr. GOODLING), for yielding me this time; and I congratulate him on the pair of bills that he passed out of the subcommittee last week.

I think if we take a look at the bills in context as a pair they are a very positive step forward, and tomorrow I will strongly urge my colleagues to support the Straight A's bill because I really believe that this is the type of program that addresses the needs of our neediest children.

Today, however, we are talking about H.R. 2. H.R. 2 is what I believe is a tinkering around the edges of a program that needs much more radical reform. If we take a look at this program and the results that it has generated over the last 35 years, here are some of what my colleagues on the full committee have said about title I: all of the reports would indicate that we are not doing very well. Another quote, to date, 34 years later, title I, since its inception, we still see a huge gap in the achievement levels between students from poor families and students from nonpoor families.

The message is consistent that title I has not achieved the kinds of results that we want, and that is why we need more significant reform than what we

find in this bill. Other quotes, I do not want new money for title I until we fix it. I am not sure there ever was a time when title I was unbroken, but it is certainly broken now.

I know what is currently the law. It is not working. We have failed those students over and over and over again. That is why we need more significant reform than what we have.

Over the last couple of years, we have had the opportunity to travel around the country and also take a look at education programs here in Washington. The project was called Education at a Crossroads. It went to many of these areas where title I is, and what the people at the local level wanted is they did not want more mandates from Washington. What they wanted is more flexibility to serve the needs of their kids. They know the names of their kids. They know the needs of the kids in their classroom, and they said please free us up from the regulations and the mandates and let us serve the needs of our kids.

What we have is, yes, we have reforms but we have a thick bill that is going to impose significantly more mandates on those schools that are going to end up focusing on red tape and meeting the process requirements rather than focusing on the needs of our kids. That is why tomorrow when we talk about Straight A's, that is what represents the type of change that we need, because what it says is, in exchange for accountability, where we measure the results of the learning for each of our kids, which is a huge new mandate on the States, but in exchange for that mandate we give the States and the local education agencies a tremendous amount of flexibility for how they meet the needs of their kids, so we measure performance and we give them flexibility. That is the kind of mirror package that we need to put together.

The Education Department has hundreds of programs and hundreds of mandates. It is why we need reform. It is why we need flexibility with accountability.

I am disappointed I have to oppose this bill, but I look forward tomorrow when we pass the Straight A's bill which will give States and local education agencies the types of flexibility they need to really improve education.

Mr. CLAY. Madam Chairman, I yield 2 minutes to the gentlewoman from Hawaii (Mrs. MINK).

Mrs. MINK of Hawaii. Madam Chairman, I believe very strongly in the Federal responsibility for public education. As we come to the end of this century, it is extremely heartwarming to me to be told by all sectors of our society that education is the most important responsibility that any level of government has and must assume if we are to fulfill the responsibilities that each of us has been given: the local

school boards, the local communities, the parents, the State government, and finally the Federal Government.

I was here in 1965 when Public Law 8910 passed and the first steps by the Federal Government were taken to try to encourage the Nation to do better in public education. After 25 years of debate, the one area that everybody, all of the different sectors of disagreement could come together on, was that the Federal Government at the very least had responsibility for the poor, the disadvantaged, the economically disadvantaged, educationally disadvantaged children of our country.

That is how Public Law 8910 came to pass. It has made tremendous strides. I disparage to hear that people are saying that it has made no difference. It has made tremendous difference, and there are numerous reports that document that. If that were not true, we would not be here today under a new majority leadership of this Congress again talking about the importance of Federal education programs. That is what we are here today under H.R. 2 debating.

Title I has been a success. We in each of our districts are terribly frustrated when we pick up the test results and see the same schools at the bottom of the list, and so we want to do everything we can to help them; but I am not sure that standardizing everything, holding everything into precise measurement, is going to fit in each of our circumstances. So I would hope that we look at this legislation and look at its creative dynamic for us to meet our responsibilities in the next century.

Mr. CLAY. Madam Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. FATTAH).

Mr. FATTAH. Madam Chairman, let me thank my ranking member and his counterpart in my home State, the chairman of the committee. These two gentlemen, along with the former governor, the gentleman from Delaware (Mr. CASTLE), and the gentleman from Michigan (Mr. KILDEE), have done an extraordinary job crafting the legislation that is now before the House, and I am pleased to rise in support of it.

This is a major step forward. It is a bipartisan bill. It responds to the national cry that we focus more on the next generation and their education than perhaps we ordinarily would do.

It is said that the difference between a statesman and a politician is the focus on the next generation versus the next election.

□ 1630

Well, this bill focuses on the next generation in an important way. I want to commend the chairman and the ranking member for their work on this bill and the subcommittee chairs.

I want to say that I want to have the opportunity to offer a couple of amendments that I hope that will improve

the bill. I know all who offer amendments are hopeful that we will be able to improve this bill. But the work that has been done should be applauded by this House.

This is a bill that today represents a significant step forward; and, rather than take time out of the general debate to focus on my amendments, I really wanted to just rise and to ask this House to make sure that, at the conclusion, we have a bill that is at least as good that has been presented to us today, because I think this bill is worthy of this House's support.

The amendments that I am going to offer is just going to attempt to even the playing field between Title I students and non-Title I students, between disadvantaged students and those who have a little more advantage in our States.

This is supposedly one Nation under God. We should work through this bill to make sure that each child has an equal opportunity. We say that a lot, but we know that, in each of our States, different children have different sets of opportunities.

The amendments that I am going to offer are going to seek to close those gaps and to make sure that, as the gentleman from Pennsylvania (Chairman GOODLING) said in his opening remarks, that the children who most need to have a qualified teacher have a qualified teacher, and that we have the opportunity in terms of equalizing spending to encourage our States to make sure that they are providing an equal playing field as the Federal Government comes in and hopefully provides a hand up for those who may be starting out in a deficit position.

I would encourage my colleagues to support the Student Results Act, H.R. 2.

Mr. GOODLING. Madam Chairman, I yield 2 minutes to the gentleman from Tennessee (Mr. HILLEARY), a member of the committee.

Mr. HILLEARY. Madam Chairman, I am proud to be before the House today to support H.R. 2. This legislation will take a step in the right direction, without question, to improve the Title I education program for our children.

Providing more flexibility and accountability for Title I is exactly what our children need in disadvantaged areas. The improvement in Title I would be felt most in our inner cities where Title I funds repeatedly get caught in a bureaucratic maze and too few of those dollars actually reach our children.

However, I also want to commend the committee for realizing that rural schools must also be helped. Within H.R. 2, there is a section that specifically will allow the rural schools to receive the aid that they might not otherwise receive.

Often rural schools are at a disadvantage in receiving formula grants, like

Title I, and competitive grants. These communities simply do not have the tax base and the access to grant writers that some of their bigger urban counterparts do. In addition, the formulas are skewed in some cases to strike against rural areas even if they have a high poverty quotient.

H.R. 2 successfully, although not completely, addresses this problem by including a rural schools initiative that will provide additional flexibility and funds for those underserved populations.

I hope that all of my colleagues can join together and support this great piece of legislation.

Mr. CLAY. Madam Chairman, I yield 3½ minutes to the gentleman from Michigan (Mr. BONIOR).

Mr. BONIOR. Madam chairman, I thank the gentleman from Missouri, my ranking member, for his time.

Madam Chairman, I want to say at the beginning how much I appreciate the efforts by the gentlewoman from Hawaii (Mrs. MINK) and the gentlewoman from California (Ms. WOOLSEY) and the gentlewoman from California (Ms. SANCHEZ) and my distinguished colleague on the other side of the aisle, the gentlewoman from Maryland (Mrs. MORELLA) and for their amendment; and that is the issue to which I would like to speak for just a second, Madam Chairman.

Their voices on this issue will and have made an enormous difference, not just in this Congress, but in the lives of young girls who will grow up to be women and leaders in their communities for decades and generations to come.

This amendment that they are offering reaffirms our commitment, our Nation's commitment to offer girls equal educational opportunities from the day they start school. That is when the difference has to be made, right out of the box, right from the beginning.

This amendment will provide important training and resources for our teachers so that they are aware of their need to be equitable in how they pursue their educational instructions in the classroom.

Different expectations lead to different academic performances. So if a girl in the classroom is not expected to excel in math or in science, which leads to careers that are lucrative in terms of their financial ability and are productive and are important in terms of the overall community, if they are not expected to excel in those areas, they will not excel in those areas.

So the attitude that is brought into the classroom by the teacher is critical, and that requires training and understanding.

Over time, if this is not done, what we have is a situation which leads to inequality and then just enormous missed opportunities later on for these girls and then eventually women. With

training, teachers could learn to get the most out of every student regardless of their gender.

Then, fourthly, let me just say that this amendment will help America close an alarming gender gap between boys and girls in technology: math, science, but also in technology. Experts predict that 65 percent of all the jobs in the year 2010 will require technological skills, but only a small percentage of girls take computer science classes or go on to pursue degrees in math and science. If girls are not being encouraged in these fields, they and their families are, as I said, going to suffer economically in the future.

In conclusion, Madam Chairman, let me just say that it used to be said that teachers can change lives with just the right mix of chalk and challenges. Well, in today's high-tech world, the challenges are there, but the chalk is not enough.

This amendment will put resources into our schools that will pay dividends for generations to come. It will create a sensitivity. It will create a training. It will create an aura that girls can do anything they set their minds to do. They can be challenged. They can meet that challenge. They can grow up with careers that will provide them, their families, and their communities great, not only challenge, but reward in the future.

I want to thank the gentlewoman from Hawaii (Mrs. MINK) and the gentleman from Missouri (Mr. CLAY), the gentleman from Michigan (Mr. BONIOR), the gentleman from Indiana (Mr. ROEMER), and all my colleagues who have worked on this legislation.

The CHAIRMAN. The Committee will rise informally.

The Speaker pro tempore (Mr. OSE) assumed the chair.

#### MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Sherman Williams, one of his secretaries.

The SPEAKER pro tempore. The Committee will resume its sitting.

#### STUDENT RESULTS ACT OF 1999

The Committee resumed its sitting.

Mr. CLAY. Madam Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. GOODLING. Madam Chairman, I yield myself 4½ minutes, the balance of the time.

Madam Chairman, I am extremely happy that this is not a status quo piece of legislation. We have had status quo in this program for the first 20 years of this program, and it was a disaster. In 1994, we added a little bit of accountability. We are not sure what that brought us yet. We will find that out after the studies are done by the

Department as to how they messed up the scoring on the tests.

I am also pleased that this has been a bipartisan effort, as most of our education bills have. I am happy to say that, so far, we passed the Flexibility Act in a bipartisan fashion. I am happy to say that we passed the Teacher Empowerment Act in a bipartisan fashion. The bipartisan Teacher Empowerment Act takes care of the class size reduction problem. The tax bill takes care of the building problem. I am happy that all of those have been passed out of our committee and on the floor of the House.

I am happy to say that, when we get to the amendment process, we will model all the preschool programs that they talk about after a program that has worked. It is called Even Start. We will make sure that, as a matter of fact, that is the model.

I think we better be careful about increasing funds. Generally, if you failed for a period of time, they say, okay, show us what you are going to do to be successful, and then we will see whether you are successful, and then we will determine whether you should receive considerably more money.

I am sure that, by the time we implement this and it is in vogue for a couple of years, we will be able to go to the appropriators and say look how successful we have been, and they will be very happy to increase funds.

So when we get to the amendment process, we will all have different ideas of how we make this bill better. I have heard the subcommittee ranking member say that on many occasions, and I always say, "but that means we have to do it your way." So we will see how that process goes.

But to this point, we have had a wonderful time. We had a horrible 4-day markup. But everybody had an opportunity to vent their emotions and whatever else they were doing at that particular time. The end result will be that the most disadvantaged youngsters, the children who need us the most, will benefit from this program. They will not continue to be left behind. We cannot afford to leave them behind.

Mr. MANZULLO. Madam Chairman, I reluctantly rise today to express my concerns about the Student Results Act, H.R. 2.

The proponents of this bill attempt to accomplish many positive reforms to several federal education programs, such as reinforcing parental rights in the bilingual education program; offering school choice, if states want it, for students in low performing schools; and changing the poverty threshold requirement for school-wide program eligibility.

However, while I believe this legislation is well intended, I am deeply concerned by this bill's overstepping of the authority of the federal government. Just because the federal government is responsible for about 6 percent of a state's (or local district's) total education budget, it appears that some of my colleagues
